"Now we hold belief to be not seen, upon the evidence of teatimony. Belief is different from un-derstanding evidence or knowledge. for these rest entirely upon testi-mony of things seen. It is different from credibility, probability or opinion for these depend upon arguments entirely. Belief rests upon credible testimony. Much that today is called knowledge is purely mith. When we say we believe, then we mean something definite if we say truly, and if we either believe of have faith our entire life is influenced strongly by that in which we believe. Many an one professes faith and belief in God and Christ when their life clearly shows that they only have an opin-ion about, rather a faith in the Lord. No one can believe in Christ and not have it manifest in daily It is well then that we all look well to the foundation of our tope for eternal life. "I believe in God! That is the

fountain head of all thought and life. That is where civilization begins. There is not a stream of blessing and joy flowing across humanity any-where that does not ultimately rise from that source. God is the greatest thought that can occupy tuman minds. Atheism is the rare exception. It is like the total eclipse of the sun, unnatural and rare. We do not believe in God because the Bible says there is a God. The Bible rests on the belief in God and not the be-lief in God upon the Bible. Whole Whole races and ages have believed in a God without having the Bible.

"All accept that God is a God of power. Some believe that God is only power, energy, force or law all powerful in its working. power, energy, force and law by contact and experience, but we never knew either of these to work to a plan unless guided by mind and thought It requires a mind to build a city or a watch. Can it require less to build a universe? No all powerful senseless force could do require less to build a universe? God's work any more than it can do yours and mine when the thought and guidance of mind is lifted.

"Not only did God create a world, but he sustains it in living fullness. Luther Burbank, noted for wonderful transformations in plant life, says. All my investigations have led me away from the idea of a dead material universe, tossed about by various forces, to that of a universe which is absolutely all force, life, soul, thought or whatever name you choose to call it. Every atom, mole-cule, plant, animal or planet is only an aggregation of organized unit for ces, held in place by stronger forces thus holding them for a time latent though teeming with inconceivable power. The universe is not half dead but all alive. Think of it! Here is a fragmant of mineral or a tiny vegetable. It is not inert and lifeless. It is a storehouse of stored energy. This life power is all through nature's realm and it continues. is still today the 'Almignty Creator' in daily holding the equilibrium of the earth's mighty powers. He is an active God.
"Jesus Christ gives in the prodi-

We read that fathers know what they would do if it were their boy drinking and gambling and going headlong to the devil. Angry for a time if a true parent, the fatherwould assert itself and they would do anything to redeem the And at last after nights of anxiety, humiliated in spirit, crushed by the burden of the boy's sin, if then he came home, returning to purlty, virtue and manhood, no words could speak the father's joy. And that is the patient, loving, blessed char-acter of the Father God that Jesus has given us. "God says, 'Call upon me in the day
